I'd be happy to join you. Are we still on for the Mille Lacs site as well?

John

Subject: Tribal Lands Forum

After the Tribal Lands Forum I am trying to make arrangements to follow-up on an inspection or two that Erin conducted last month.

The sites I am looking at both have satellite dispensers and we are trying to figure out if the piping between the Master and Slave pumps is protected by the line leak detector. If interested in taking a look at this let me know. I would anticipate that we would be there less than 30 minutes. The sites are the MN DOT facility and Penske Trucking.
